To Whom It May Concern:

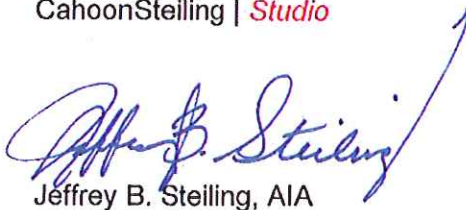

It is with great pleasure that I submit this recommendation of Construction Network, Incorporated (CNI). Over the past several years, I have enjoyed a good relationship with CNI. I have worked on various types of projects and within various types of project delivery methods. I have found the CNI staff to be efficient and hardworking in their efforts to deliver quality projects within budget and on schedule.

CNI's project team, led by George Stem and/ or Sean Stem, has demonstrated a unique ability to successfully budget a construction project. In instances where project scopes have increased beyond owner's budgets; CNI has shown excellence in their ability to value-engineer projects to deliver their owners successful projects within budget parameters.

In addition, it has been my experience that CNI has shown a great deal of proficiency in establishing and maintaining project schedules. Working with Howard Ballard, project manager, I have seen projects overcome various delays (weather, material deliveries, etc.) due to Howard's ability to adjust the schedule and compensate for unforeseen and unexpected obstacles. CNI's commitment to monthly progress meetings and constant updating of schedules has proven extremely valuable in their success of delivering projects in a timely manner.

In short, I have no hesitations in recommending CNI for your construction project. I am certain they will perform at the highest level to deliver a successful project.

Respectfully,
