Re: George Stem
Construction Network, Inc.
1723 Executive Square
Jonesboro, AR 72401
(870) 972-5632

To Whom It May Concern:

Mr. Stem's construction company, Construction Network, Inc. (CNI) was the general contractor and builder of the Woodruff County Nursing Home in McCrory, Arkansas. CNI broke ground on the nursing home in September, 2006 and completed the 74,000 + sq. ft. project within the 300-day schedule allotted in the contract.

CNI was forthcoming and courteous with all construction hurdles during the course of the project. Furthermore, very nearly every phase of the project attained 100% completion before projected deadlines. The Project Manager, Howard Ballard, and his foreman, Todd Blankenship, maintained and managed the construction site and the sub-contractors in an efficient, pro-active, and solution-oriented manner. I personally very-much enjoyed working with both of these gentlemen throughout the entire construction schedule. CNI was elemental in helping maintain client-to-construction relations and diplomacy as well.

Perhaps the best testament to CNI's work on the McCrory Nursing Home is that the client, the owner, and the construction team were and continue to be pleased, proud of, and excited about the finished building's appearance and function.
