To Whom It May Concern:

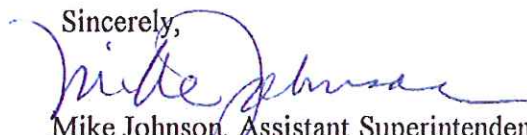

Construction Network, Inc. was the general contractor for a new 700 student junior high school for the Nettleton School District. Our school administration was significantly impressed with Construction Network's ability to get this project started quickly and maintain the timeline with top quality workmanship. The result was a beautiful school ready for our student to begin the new school year.

The Nettleton Performing Arts Center was designed as a state-of-the-art 750 seat auditorium with vocal music and dramatic arts classrooms, set building and storage areas. Nearly every phase of this complex project was completed on time and within the designated construction budget. Upon completion, this facility has served our greater Jonesboro community with academic and cultural events on a weekly basis. The sound construction has provided a wonderful building which is easy to maintain and remains a focal point of our campus life.

It has been a pleasure to work with CNI. From ground breaking to celebrating the ribbon cutting, Construction Network worked extremely well with our school personnel, city utilities and architects to insure that we were as proud of our new buildings as they were. Our community continues to be most proud of these two facilities.

I would gladly recommend Construction Network for any facility of this magnitude.

Sincerely,

Mike Johnson, Assistant Superintendent
Federal Programs and Student Services
