ARCHITECTS

To whom it may concern:

It is a pleasure for us to write a letter of support for Construction Network, Inc. (CNI) of Jonesboro, Arkansas. Our firm has had the opportunity to work with them on several projects over the years. Most recently they were the general contractor on our design for the Flo & Phil Hospice House at St. Bernards located here in Jonesboro. This project was a facility to house patients that are in their last stages of living.

CNI did a very good job at meeting all the needs of the facility from general construction to supervision of all the various trades involved. They kept us and our shared client informed at all stages of the project, and they assisted us in solving any issue that came up during the construction. They even provided completion of all project close-out documents as required by Arkansas Department of Health who regulate hospice facilities.

We at Stuck Associates Architects are very please to recommend CNI as a general contractor for your project.

Sincerely,

Dewaine Beisner, Project Architect
